KONGRES PALIJATIVNE MEDICINE SRBIJE

1st PALLIATIVE MEDICINE CONGRESS OF SERBIA

Poštovane kolegice i kolege,
Dragi saradnici,

Zadovoljstvo mi je da Vas pozovem na Prvi kongres palijativne medicine Srbije pod nazivom „**Integracija palijativnog zbrinjavanja u neurologiji, pulmologiji i onkologiji**“. Od izuzetne nam je važnosti da pružimo priliku svim zainteresovanim stranama da uzmu učešće u ovoj veoma važnoj temi i da tokom trajanja skupa razmenimo znanje i iskustva, kao i da unapredimo saradnju sa ciljem poboljšanja statusa naših pacijenata koji su u potrebi za palijativnim zbrinjavanjem.

U dva dana skupa eminentni eksperti iz zemlje i inostranstva iz oblasti palijativne medicine, onkologije, neurologije i pulmologije podeliće svoja znanja o dijagnostičkim algoritmima, metodama procene težine bolesti, aktuelnim terapijskim modalitetima, suportivnoj i simptomatskoj terapiji, interventnim i drugim metodama lečenja od značaja za multiprofesionalni pristup obolelima od maligniteta, respiratornih i neuroloških bolesti koje zahtevaju palijativno zbrinjavanje.

Nadamo se da će ovaj Kongres biti još jedan korak u unapređenju palijativnog zbrinjavanja kojim ćemo zajednički poboljšati kvalitet života naših bolesnika obolelih od neizlečivih bolesti kao i biti podrška njihovim porodicama tokom lečenja.

Dobro nam došli!

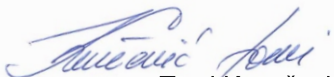

Dear Colleagues,
Dear Associates,

It is my pleasure to invite you to the 1st Palliative Medicine Congress of Serbia titled: "**Integration of Palliative Care in Neurology, Pulmonology and Oncology**". It is extremely important for us to provide an opportunity for all interested parties to participate in this very important topic and to exchange knowledge and experience during the meeting, as well as to improve cooperation with the aim of improving the status of our patients in need of palliative care.

During the two-day gathering, eminent experts from the country and abroad in the fields of palliative medicine, oncology, neurology and pulmonology will share their knowledge about diagnostic algorithms, methods for assessing the severity of the disease, current therapeutic modalities, supportive and symptomatic therapy, interventional and other treatment methods of importance for multiprofessional access to patients with malignancy, respiratory and neurological diseases that require palliative care.

We hope that this Congress will be another step in the improvement of palliative care by which we will jointly improve the lives of our patients suffering from incurable diseases as well as support their families during treatment.

Welcome!

Tomi Kovačević
