Dear Guests,

On behalf of the Organizing and Scientific Committees, it is our great pleasure to welcome you to Novi Sad and to the International Symposium on Nuclear Medicine. We are delighted that you have joined us and look forward to sharing several days of scientific exchange, discussion, and collaboration.

The program of this Symposium highlights recent advances in nuclear medicine, bringing together diagnostic imaging and therapeutic applications, with a special focus on nuclear medicine theranostics. This integrated approach, combining imaging and targeted therapy, continues to transform clinical practice and open new possibilities for personalized patient care.

We are honored to host distinguished invited speakers who are leading experts in their fields and who will present state-of-the-art lectures as well as their own latest research and clinical experiences. Alongside these presentations, the Symposium offers an excellent opportunity for participants to share their work, exchange ideas, and learn from one another.

Scientific meetings are not only about learning new facts and technologies, but also about bringing people together. They allow us to meet colleagues from different countries, build new friendships and professional contacts, strengthen existing collaborations, and gain fresh perspectives that inspire future research and clinical practice.

Through this Symposium, we aim to review the current state of nuclear medicine including general nuclear medicine, metabolic imaging and therapy—and to discuss future challenges and directions in this rapidly developing field.

We wish you a warm welcome to Novi Sad, a pleasant stay, and a memorable and enriching scientific experience.

*Sincerely Yours,
Prof. Jasna Mihailović
President, Organizing Committee*
